

Norman D. Radtke, MD

Retina Vitreous Resource Center

UPDATED RETINAL BULLETIN

If you suspect or have patients with Choroideremia, X linked Retinitis Pigmentosa, RP6R or Achromotopsia, we can screen these patients to determine if they are candidates for gene therapy protocols.

If you would like more information please call our office at 800-643-8197 and speak with Norman Radtke, MD or Kevin.
