

RETINA BULLETIN

The management of patients with bothersome vitreous floaters is controversial. The article below examines the treatment options and makes recommendations as to what is needed to evaluate this condition accurately.

“Assessment of Vitreous Structure and Visual Function after Neodymium:Yttrium-Aluminum-Garnet Laser Vitreolysis”

Ophthalmology, Vol 126, Number 11: 1517-1526, Nov. 2019
